FINAL ACTION

Status of the Claims

1. This action is in response to papers filed 29 April 2004 in which claim 28 was amended and arguments regarding the cited prior art were presented. This action is further in response to Interviews between the examiner and Applicant's representative on 2 July 2004 in which amendments were discussed to place the claims in condition for allowance and on 6 July 2004 in which the examiner informed Applicant's representative that the amendment "smaller than or about 1 square millimeter" is not supported by the specification.

The previous rejections in the Office Action dated 29 October 2003 are withdrawn in view of the amendments. New grounds for rejection, necessitated by amendment, are discussed.

Claims 28-46 are under prosecution.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 28-46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the

Art Unit: 1634

relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The recitation "an area smaller than or about 1 square millimeter" is added to the newly amended independent claim 28 from which claims 29-46 depend. However, the specification fails to define or provide any disclosure to support such claim recitation. Applicant points to page 3, lines 28-29, page 6, line 6, page 12, line 5 for support for the amendment. Page 3 defines the space bar illustrated in Fig. 3-4 as corresponding to 1 millimeter. Pages 6 and 12 both define the spots on the microarray as having a diameter of about 100 μ m with center-to-center spacing of about 140 μ m. The claim, as amended, defines the sample location as having an area in the range of about 1 millimeter to 0. The specification does not teach this range. In Figures 3-4 the spots are illustrated as being much than 1 millimeter. Hence, the illustrated spots do not support the upper limit of the claimed range i.e. "about 1 millimeter". Furthermore, the passages cited teach spots of "about 100 μ m". This teaching also does not support the upper limit of the claimed range i.e. "about 1 millimeter". Therefore, the specification does not provide support of the claimed range of sample area.

MPEP 2163.06 notes "IF NEW MATTER IS ADDED TO THE CLAIMS, THE EXAMINER SHOULD REJECT THE CLAIMS UNDER 35 U.S.C. 112, FIRST PARAGRAPH - WRITTEN DESCRIPTION REQUIREMENT. *IN RE RASMUSSEN*, 650 F.2d 1212, 211 USPQ 323 (CCPA 1981)." MPEP 2163.02 teaches that "Whenever the issue arises, the fundamental factual inquiry is whether a claim defines an invention that is clearly conveyed to those skilled in the art at the time the application was filed...If a claim is amended to include subject matter, limitations, or terminology not present in the application as filed, involving a departure from, addition to, or deletion from the disclosure of the application as filed, the examiner should conclude that the claimed subject matter is not described in that application." MPEP 2163.06 further notes "WHEN AN AMENDMENT IS FILED IN REPLY TO AN OBJECTION OR REJECTION BASED ON 35 U.S.C. 112, FIRST PARAGRAPH, A STUDY OF THE ENTIRE APPLICATION IS OFTEN NECESSARY TO DETERMINE WHETHER OR NOT "NEW MATTER" IS INVOLVED. APPLICANT SHOULD THEREFORE SPECIFICALLY POINT OUT THE SUPPORT FOR ANY AMENDMENTS MADE TO THE DISCLOSURE" (emphasis added).

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1634

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
